WHY CLEANSE?

No other aspect of skin care is quite as basic (or as important) as this one. Cleaning your skin sets the stage for everything else that you will do to it (i.e., exfoliate, moisturize, repair, etc.) As such, it's essential that the cleansing products you use be gentle. Over-cleansing or using cleansers that are too drying is a major cause of irritation, inflammation, dry patches and redness. Not cleansing the skin well enough can clog pores and leave a residue on your skin. Using a cleanser that leaves a greasy film can clog pores and prevents moisturizers from being able to absorb. The few extra minutes it takes you to clean your face properly will be reflected in the health and appearance of your skin.
